

SECURE WEB GATEWAY: DIRECT PROTECTION WITHOUT DETOURS

Why stop over when you can go **Maverc-direct**?

The Maverc Secure Web Gateway eliminates the old-school data center bottlenecks with on-device SSL inspection and direct-to-web connections — enhancing speed, reliability, and privacy.

Maverc SWG reimagines how web traffic is secured. Built into the Maverc Control Layer Platform, our fly-direct architecture ensures that your data flows securely — without latency, outages, or detours through outdated infrastructure.

With intelligent local inspection, support for HTTP/2, and integrated threat defense, Maverc SWG enables secure, high-performance web access across Windows and macOS — all from a single, unified control console.

Maverc Tools

Domain app control

Account detection with Shadow IT

Malicious websites protection

Data Loss Prevention

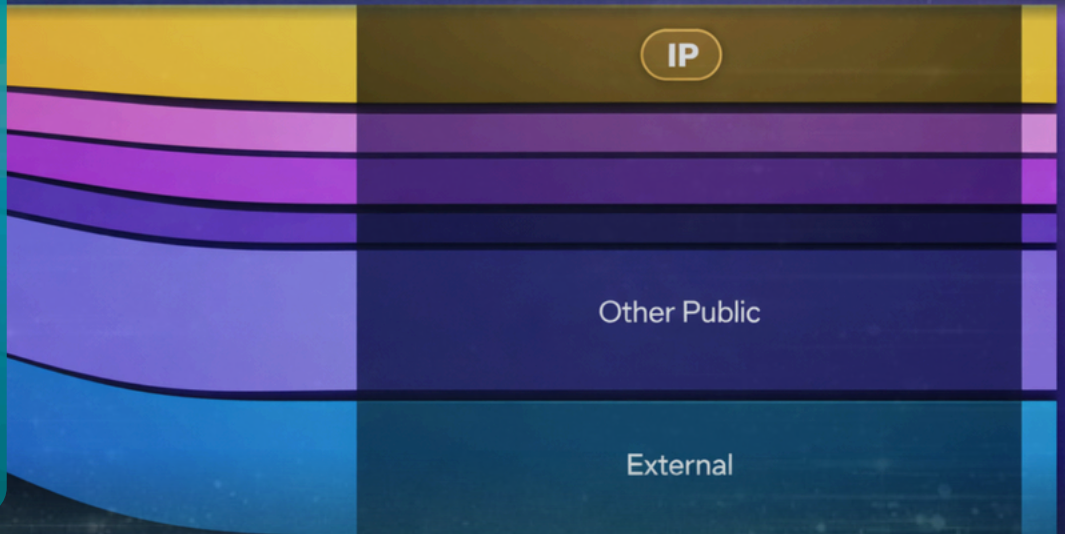

MAVERC CASB NEURAL

Your SWG, now powered by AI-enhanced DLP for Cloud Applications

MAVERC FEATURES

- REDESIGN ARCHITECTURE
- SINGLE-CONSOLE
- SINGLE-SIGN ON & AUTO SYNCING
- CLOUD APP CONTROL
- SSL INSPECTION
- BEAUTIFUL ANALYTICS
- AI / LLM-POWERED DLP
- FIRST-CLASS USER EXPERIENCE

Quick overview
Public & External share review counts

PII

2401 Public Files

DOPAMINE
This is a datasheet describing a new SWG (Secure Web Gateway) by dope.security. It's safe for public share and does not contain any sensitive information.

Instant Discovery of Shared Files in OneDrive / Google Drive

With one-click authorization, Maverc Neural instantly scans your organization's Microsoft 365 or Google Workspace tenant. It identifies externally shared files containing PII, PCI, PHI, Intellectual Property, or other Public Data — with no policies or setup required.

"Appointment ID: ABC-DEF01234567"

What - Patient/Information

Status - **To Review**

Make Private

Remediate Instantly from the Console

Whether it's passport numbers, HIPAA violations, or exposed documents — Maverc Neural lets you remediate with a click. Mark data private or review it immediately, all from one interface.

Maverc Insight

A fully automated summary engine that interprets sensitive file content in plain language, powered by large language models (LLMs). Upgrade from legacy DLP regex detection and reduce false positives with confidence.

NAME	VERIFIED	USERS	TYPE	REVIEW	USERS
HubSpot	Yes	120	Global	To Review	This looks okay, ER
Slack	Yes	48	Global	To Review	
Dropbox Sign	Yes	24	Limited	To Review	
Airtable	No	4	OIDC	Reviewed	

App Access Intelligence via API

Quickly reveal all third-party apps connected to your Microsoft 365 or Google Workspace tenant. View granular access types, scopes, and login permissions — and revoke instantly when needed.
